Maritime Industry Standards &
Requirements

Course Plan

Introduction

The maritime industry is one of the most vital pillars of global trade and logistics. With the continuous expansion of regulatory frameworks and international conventions, professionals in this sector must stay up to date with the latest standards and compliance requirements.

This training program aims to provide participants with a solid understanding of maritime industry standards, safety protocols, environmental compliance, and operational requirements, ensuring effective and safe maritime operations.

Course Objectives:

- ✓ Understand the international and national regulatory environment of the maritime industry.
- ✓ Identify and interpret major maritime conventions such as SOLAS, MARPOL, and STCW.
- ✓ Apply safety and operational standards for shipboard and port activities.
- ✓ Implement environmental compliance requirements in maritime operations.
- ✓ Prepare for and manage maritime inspections and audits.
- ✓ Enhance safety and quality management systems on board ships.
- ✓ Stay updated on emerging regulations and international trends in maritime governance.

Who Should Attend?

- Maritime company professionals and operators
- Safety, compliance, and quality officers
- Ship officers and crew members
- Port authority personnel
- Marine engineers and technical staff
- Legal advisors and maritime consultants
- Training and development officers in maritime organizations
- Students and graduates of maritime academies

Training Methods:

- ✓ Online Video material.
- ✓ Presentation.
- ✓ Live Interactive sessions.
- ✓ Course presenter will make extensive use of all tools that will be needed for the virtual environment.
- ✓ Questions & Answers
